

Gatut Prasajo

Full-Stack Software Engineer - Indonesia (Remote)

gatpras@gmail.com | +62 852 3110 0808 | github.com/gutat | linkedin.com/in/gutat | Indonesia - Open to Remote Worldwide

SUMMARY

Full-stack software engineer based in Indonesia, available remote, with 9+ years of professional experience coding since February 2017. I design, build, and operate end-to-end systems from desktop and web to mobile and cloud infrastructure, owning the full lifecycle from database architecture and backend APIs to frontend interfaces, DevOps, and production operations. Focused on reliable, maintainable software across Windows, Linux, and Android. Known for strong performance optimization (9/10), practical UX improvements (8/10), thorough debugging (8/10), and clean architecture. Currently expanding into Rust.

EXPERIENCE

Full-Stack Software Engineer - Enterprise Systems & Product Development

Feb 2017 - Present 9+ years

9+ years building mission-critical software across desktop, web, and mobile. End-to-end ownership from requirements and system design to database modeling, backend/frontend development, deployment, and maintenance. Built ERP modules (purchasing, inventory, finance, reporting), real-time messaging platforms, and cloud deployments serving thousands of daily users. Led small teams, reviewed code, optimized legacy systems for performance/reliability, and integrated third-party services and hardware.

KEY PROJECTS

Local AI Troubleshooting Assistant - Python (RAG) + Qdrant

On-premise AI chat in Python with RAG + Qdrant vector search. Answers queries like how to troubleshoot a printer from internal knowledge bases. Fully local, no external API. Includes ingestion, chunking, Qdrant indexing, and chat UI. Relevant to AI training tasks.

Automated Journaling Service - Go

Go service automating journal entries and financial postings. Handles bulk processing, validation, and reconciliation with high concurrency and low resource usage on Linux.

Enterprise ERP System

Business suite with Java desktop, Laravel/AdonisJS backend, Flutter mobile. Modules: purchase, inventory, finance, reporting. MSSQL/MySQL/PostgreSQL + Redis, Docker/Podman/Nginx on Linux VPS.

Social & Real-Time Messaging Platform

Farming community platform with feeds, groups, WebSocket 1:1/group chat, presence, notifications. Flutter client with offline support and UX iterations.

Cloud Infrastructure & Rust Backend (WIP)

Self-hosted infra on Linux: Docker, Podman, Nginx, WireGuard. Developing Rust backend framework (learning, WIP) for memory-safe services. Customized Odoo Community Edition.

Open Source - github.com/gutat

odoo_modules (odd_invoice, odd_scale, odd_tauri, odd_themes, vue_app) - JS/Python. agrons - Nuxt + Supabase platform, 25 commits.

EDUCATION

S1 Teknik Komputer - Universitas Brawijaya, Malang - Bachelor of Computer Engineering

TECHNICAL SKILLS

Languages: Python, JavaScript, Go, Java, PHP, Rust (learning)

Backend: Python (RAG), Node.js/AdonisJS, Go, Java, Laravel, Rust (WIP) | **Mobile:** Flutter, JavaScript, Android

Database: MSSQL, MySQL, PostgreSQL, SQLite, Redis, Qdrant | **OS:** Windows, Linux, Android

AI/Real-time: Local AI (RAG), WebSocket | **Infra:** Docker, Podman, Nginx, Cloud VPS, WireGuard | **ERP:** Odoo CE (custom)

LANGUAGES

Indonesian Native (10/10). English - Reading 9/10, Writing 7/10, Listening 8/10, Speaking 6/10; comfortable for remote async work and documentation.
